PROFESSIONAL EXPERIENCE

Snr IT BA: Technical Lead & AU Innovation Champion

DB Schenker

- Lead Business Analyst: IT Solutions Development and Implementation for Contract Logistics.
- Demand Management: Prioritisation and Delegation of Software Development tasks.
- Innovation Management: Business Advocate for new products/services/processes for Innovation & Digitisation in Australia.
- Change Management: Key Coordinator between Business Operations and IT Development teams for Application Enhancements.
- Analytical Solutions Leader: Business Architect for Machine Learning, Data Modelling, Predictive Analytics, Artificial Intelligence, and Big Data Solutions.
- Team Leader: NextGen IT Team for System Development and Customer
- Itteration Manager: Daily Agile Meetings and Kanban-style IT Project management.

Academic & Support Lecturer

University of Technology Sydney

- ## 03/2020 Ongoing
- Teaching in the Masters of Data Science and Innovation
- Support Lecturer for subject: Machine Learning Algorithms and Applications
- Teachers Assistant for subject: Data Algorithms and Meaning

IT Business Analyst: NextGen System and Business Innovation

- Lead Developer: Live and interactive BI Dashboards using SSRS and PowerBI.
- Lead Analyst: IT Solutions Development and Implementation.
- Systems Analyst: Providing intimate systems support for key customer during large-scale product launch.
- IT Specialist: IT Security Auditing and migration to Secure-Shell connections.
- Implementations Specialist: Customer migrations from Legacy to NextGen Warehouse Management System.
- Subject-Matter Expertxpert: Data visualisation, real-time operational reporting, and user-friendly dashboard design.

National Service Quality Analyst

TNT Australia

- Stakeholder Management: Operations associate to the IT department.
- Subject Matter Expert of interactive and visual analytics.
- Lead Analyst in development of operational data models.
- Process Champion of SOP Development and KPI reporting.
- Achieved success in creation of live-data analytics and real-time operational dashboards

Business Systems Analyst

Toll Global Express

- Lead Analyst for customer forecasting and operational performance.
- Development of depot-level and customer-specific forecasting models.
- Utilisation of t-SQL to develop data model to forecast received volume per customer, per freight-profile, per day; achieving an accuracy of within 2.5%.
- Deployment of dynamic analytics dashboards and interactive reports.
- Streamlined National Reporting Dashboards, to provide support for national sales and operational teams.

Previous Roles

Within the Toll Group

- Business Analyst Operations Support (08/2015 05/2016) (Toll IPEC)
- NSW Operations Manager (05/2015 06/2018) (Toll Specialised Solutions)
- NSW Risk Coordinator (06/2014 07/2015) (Toll IPEC)
- Internal Sales Consultant (05/2013 06/2014) (Toll IPEC)
- PM Shift Operations Supervisor (11/2011 05/2013) (Toll Express)

ABOUT ME

I am an astute and engaged individual. Whilst working full-time, I have completed a double degree part-time, and a Master's degree. I continue to Volunteer with Rotary International; focusing on leadership development programs. I can maintain high levels of success in all areas of my professional life. As proven by my achievements: Dean's Medal, Golden Key, Citizens Scholar, Academic Engagement Award. I am keenly interested in Data Science, Innovation, Continuous Improvement, Lean Six Sigma, Big Data Analytics. I am competent in multiple programming languages (Python, R, SQL, VB, M), and am experienced in many analytical platforms (SSRS, PowerBI, MiniTab, RStudio, Azure, Jupyter). I have a very pragmatic approach to work, always asking questions like "How can this improve business outcomes?". I strike a perfect balance between business acumen and technical expertise.

APPLIED LEADERSHIP

Rotary Youth Leadership Awards

Facilitator: Summer 2016, 2019, 2020, 2021

Participant: Summer 2015

Rotary Youth Program of Enrichment

Facilitator: Summer 2015 to 2019 Mentor: Winter 2015 to 2019

International Leadership Programme

Participant: Winter 2017

Model United Nations Assembly

Adjudicator & Coach: 2017 to 2019

Rotarian in Lower Blue Mountains

March 2015 to Current

DB Schenker APAC

NextGen WMS Technical Training

DB Schenker APAC

Workforce Capacity Planning

- Utilise historic data to formulate time-series forecasting models to predict future volume quantity.
- · Implement real-time data set and high-quality dashboard.
- Impart data-driven analytical advice for the Operations team to improve their daily performance results.

Exploring Undernourishment

- Explore the open-source Global data from the Food and Agrigultural Organisation of the United Nations.
- Implement tree-based predictive model for predicting the Prevalence of Undernourishment.
- Wrote an open-source App and published an 8-part Blog piece.

High-Profile New Product Release

- Working with a team of 10 Operations Managers on a high-profile new product release, occurring in September 2018.
- I developed and deployed eight live and dynamic reporting dashboards, for use with daily operational performance.
- Designed and integrated the operational material-flow and process-flow documentation, for maximum efficiency and performance.

Reduction of Outstanding POD's

- Reduction of Outstanding Proof of Delivery (POD) consignments from 1.4% (aprox. 800 cons. per week) to a stable 0.3% (aprox. 150 cons. per week).
- Project manager for a cross-functional team of 10 people, utilising Lean Six Sigma technologies and methodologies.
- Achieved a sustainable result whilst managing competing priorities and various operational challenges (including politics, resources, and procedure documentation).

TGX S&OP Rollout

- - Establishment of a forecasting method for customer volumes. This uses historic data combined with customer intelligence.
- The forecasts enable the operations staff to gear-up or gear-down their labour force accordingly, in response to anticipated volume.
- Integrated utilisation of t-SQL database development, combined with Excel VBA report distribution, and Power BI dashboard visualisation.

IPEC KPI Development

- Development of a suite of 88 Key Performance Indicators (KPI's) for use by IPEC Handling, Linehaul and PUD teams; for use by Managers from Frontline Supervisors to Executive Level Managers.
- Directly responsible for the development and dissemination of templates and dashboards to be used by the relevant staff to compile, analyse and report on the particular KPI's.

Bungarribee Operational Turnaround

- As part of the Bungarribee Operations team, directly contributed to a reduction in Operational costs of \$3.2Mil.
- Focusing on three primary areas: 1. Conversion of labour from casual to permanent; 2. 80% reduction in Overtime 2.0; and 3. Purchasing of fleet vehicles to replace rentals.
- The end result yielded upwards of \$7.2Mil in annualised savings (\$4Mil above original estimates), due to a further reduction in Overtime 1.5.

ACCOLADES

Western Sydney University Citizens Scholar Award (2018)

Deans Medal (2016)
Graduating in the top 2% of my cohort.

Deans Merit List (2013, 2014, 2015, and 2017)

Finishing in the top 15% per academic year.

Academic Engagement Award
At the Western Sydney University Academy

Excellence Awards in 2017

Golden Key International Honor

Society (2012, 2017)
For outstanding academic performance.

Lean Six Sigma

Green Belt: 2017 Yellow Belt: 2016

Paul Harris Fellow

Awarded: 2018 1st Sapphire: 2020

Duke of Edinburgh's Award Gold (2009), Silver (2007), Bronze (2006)
