COLOURED METALS

We can now match your Pantone coloursrs and use them as the base for your metalworks! By painting over the metal, we achieve precise color accuracy and a flawless finish. This customization option adds a professional touch, allowing for unique designs while maintaining a high-quality, consistent look. Perfect for branding, artistic creations, or personalized projects!

TEXTURE OPTIONS

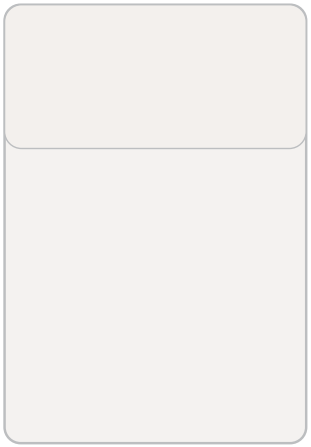

By adding these recessed textures to your metals, this will elevate the overall design of the metals and give a high end design!

FILL OPTIONS

more options for you

SOFT ENAMEL

Soft enamel fills recessed metal areas with colored enamel that is baked to harden. The enamel sits below raised metal lines, creating a textured, vibrant, and durable finish.

HARD ENAMEL

Hard enamel is created by filling recessed metal areas with enamel and polishing the surface flat after baking. This produces a smooth, durable finish where the enamel and metal sit level with each other.

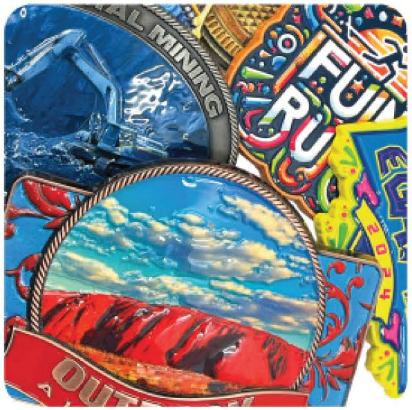

DIE STRUCK

Die struck pins are made by stamping a design directly into metal without adding color. They feature raised and recessed metal areas, giving a classic, polished or antique metal finish.

UV PRINT

UV printed pins use a digital printer to apply detailed, full-color designs directly onto the surface. The ink is cured instantly with UV light, creating a smooth finish that's ideal for gradients and complex artwork.

3D UV PRINT

3D UV print adds layers of UV-cured ink to create a raised, textured effect on the surface. It allows for vibrant full-color designs with added depth and a slightly embossed feel.

PVC MATERIAL

PVC material are made from soft rubber-like material that is molded to create the design and colors. They are durable, flexible, and great for bold designs with raised and recessed areas

GLOW IN THE DARK

Glow in the dark enamel use special phosphorescent materials that absorb light and glow in darkness. They add a fun, eye-catching effect while keeping the design visible at night.

GLITTER ENAMEL

Glitter enamel adds sparkling glitter particles into the colored enamel areas of the design. This creates a shimmering effect that catches the light and adds extra visual impact.

FLOWING SAND GLITTER

Flowing sand glitter pins feature a clear window filled with loose glitter that moves when the pin is tilted. This creates a fun, dynamic effect as the glitter flows inside the design.

DIGITAL PRINT CLEAR EPOXY

Digital print clear epoxy pins use full-color digital printing to apply detailed artwork onto the metal surface.A clear epoxy coating is added on top to protect the design and give it a smooth, glossy finish.

TIES N CUFFS .COM.AU

LOVED THE EXPERIENCE

★ ★ ★ ★ ★

Very attentive and patient with all of our needs of changing things that we are requested. The custom tokens came out perfectly.

Exceeded our expectations and more. Finalising the order and receiving the items was no time at all. Quickest production and shipping.

-Livb Canvas Empire

GREAT COMMUNICATION & SERVICE

★ ★ ★ ★ ★

I'm very happy with Ties 'n Cuffs. They answered all my questions promptly and kept me updated on the progress of my order, which was much appreciated as i had a deadline. They also helped me make this deadline!

-Cloncurry

HIGHLY RECOMMENDED!

★ ★ ★ ★ ★

-Strange Matter

AMAZING SERVICE

★ ★ ★ ★ ★

Thank you for your wonderful, speedy and accurate work! Our community loves the custom made pins you created for us, and we will definitely be back for future custom work we may need done. Highly recommend.

-People with Purpose

EXCEPTIONAL CUSTOMER SERVICE

★ ★ ★ ★ ★

Exceptional customer service and a high quality product. Absolutely in love with our company lapel pins. Thank you TiesNCuffs! We'll be back for more.

-Matt Le

EXCELLENT QUALITY

★ ★ ★ ★ ★

The team at TNC are helpful and knowledgeable in creating custom designs. Excellent quality and shipping time!
